

TRANSVERSAL LAMINAR BLOCKS - CBT

2041/52/754522P

2041/61/3007525

Part Number	Dimensions (mm)			Pole pitch	Weight
	L	I	H		
2041/52/754522P*	75	45	22	3+2	1
2041/52/1005025P*	100	50	25	3+2	2
2041/52/1507525	150	75	25	3+2	2,2
2041/52/3007525	300	75	25	3+2	4,4
2041/61/1507525	150	75	25	1+1	2,2
2041/61/3007525	300	75	25	1+1	4,4

* Sold as pair

Use : These laminar blocs are not magnetic but are able to transmit the magnetism from the chuck to the workpiece. Pole pitch of the laminar blocs must be parallel to those of the magnetic chuck. These blocs are silver brazed and can be machined and shaped. Using these blocs will avoid damaging the chuck surface when drilling or machining.

Specification :

- Transversal pole pitch 3 + 2 mm or 1 + 1 mm
- Silver brazed (steel/brass)
- Use of these blocs will reduce magnetism flux (approx 20% with a 25 mm height bloc)
