

LIQUID RING PUMP VACUUM SYSTEM

Use :

Liquid ring pumps are particularly suitable for machining with large amounts of coolant (coolant is used by the pump during vacuum process before being returned back to the machine). These types of pumps have an average of 95% vacuum level.

Features :

Our vacuum systems are supplied with :

- Switch control box.
- Vacuum gauge.
- Coolant filter (except on 95m³/h type)

Dimensions (mm)					
Type	Flow m ³ /h	Liquid flow volume	Motor power	Voltage Ac / 50 Hz	Weight kg
5013/01/10	9,7	150 L/h	0,55	1 x 230 Vac	20
5013/01/25	24	250 L/h	0,75	1 x 230 Vac	30
5013/01/50	47	550 L/h	1,5	3 x 400 Vac	45
5013/01/100	95	1200 L/h	3	3 x 400 Vac	100
